

FloraLife®

LeafShine

Formulated to give hard-leaf foliage plants an appealing, protective shine

FloraLife® LeafShine is designed to provide a natural, healthy shine to foliage plants with smooth, hard leaves. This ready-to-use, fast-drying aerosol formulation works in three ways: to clean plant foliage, add a non-oily natural shine, and protect foliage plants against dust, water spots, calcium deposits and excessive evapotranspiration. Foliage plants look healthier, stay attractive longer and exhibit greater appeal at retail. With an easy-to-use spray nozzle and pleasant natural scent, FloraLife® LeafShine makes application fast and simple.

Applications

Ideal for hard-leaf foliage plants that benefit from a sheen on upper leaf surfaces. Not suitable for ferns, succulents or plants with fragile or pubescent foliage.

Features & Benefits

- + Fast-drying, ready-to-use aerosol spray cleans foliage as it shines, leaving hard-leaf foliage plants looking healthier and more attractive to end consumers.
- + Free from oily residues, product's natural shine keeps foliage cleaner longer than competing oily leafshine products that attract dust to leaf surfaces.
- + Cleaning action removes existing water spots and calcium deposits on foliage and prevents future spots or deposits from forming on leaves.
- + Reduces evapotranspiration rates from treated leaf surfaces, helping plants conserve water and maintain a firm, attractive appearance.
- + Ready on demand, the convenient spray provides a pleasant, natural scent. No offensive, lingering odors to inhibit retail performance and sell-through.
- + Suits most hard-leaf foliage plants. Not suitable for ferns, succulents or plants with fragile or pubescent foliage.

Cleans foliage for a healthier, more appealing appearance

Provides a natural shine with no oily, dust-attracting residue

Removes and prevents water spots and calcium deposits

Reduces evapotranspiration, helping plants conserve water

Fast-drying aerosol spray has a pleasant, natural scent

Technical Specifications

Product Description: Plant-friendly FloraLife® LeafShine is a fast-drying, ready-to-use aerosol leaf treatment designed to clean and protect hard-leaf foliage plants and deliver a natural, oil-free shine.

Storage and Handling

Store aerosol container in a cool, dry location away from direct sunlight and temperatures that exceed 122°F/50°C. Keep container closed when not in use.

Food Safety

This product is intended only for use on ornamental plants, not for food use.

Disposal

Dispose of empty aerosol containers with general waste. For unused products, please check with your local waste disposal facility for appropriate options.

Product Options

Item Code	Product Description	Packaging	Units Per Case	Cases Per Pallet
83-17011	750 ml FloraLife® LeafShine	Can	12	84

Note: Cans are sold in case quantities only. Unit of sale is 12 cans per case.

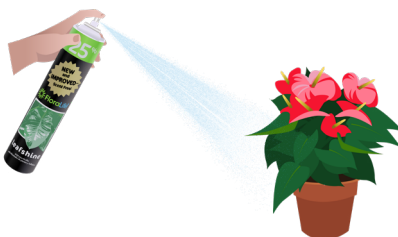

Product Usage Instructions

FloraLife® LeafShine adds an attractive shine and a competitive advantage to your hard-leaf foliage plants. Plants look cleaner, healthier and more appealing to retail buyers and end consumers. For best results, apply FloraLife® LeafShine at room temperature (68°F-77°F, 20°C-25°C) and avoid spraying in full sunlight.

Step 1

Shake aerosol spray can vigorously before spraying on foliage. Avoid spraying on flower buds or blooms.

Step 2

Hold can 12 to 15 inches (30 to 38 cm) from leaf surface. Hold can upright while spraying. Spray lightly on the upper leaf surfaces only. Move can from side to side while spraying for more even, uniform coverage.

Step 3

Allow foliage to dry at least 5 minutes after spraying before wrapping or covering the plant. This helps ensure an appealing, uniform, natural-looking sheen.
